Production Name: PORTOFINO 80 Model: AZ5638

①

②

- ①The light source is facing up, and the two iron pipes are twisted into the aluminum hole of the light source
- ②After the iron lampshade is aligned with the hole position, it is installed flat into the iron pipe
- ③Aluminum parts tighten the iron pipe, lock the lampshade, and lock the side screws

Note: The wire at one end of the anti-scalding label is positive
